WHO WE ARE

Innovation, Creativity & Learning

Robopulse is an innovative education solutions provider dedicated to empowering school students and teachers with cutting-edge skills and knowledge. Our mission is to bridge the gap between traditional education and modern learning methods, fostering a love for learning and promoting academic excellence.

Mission

Our mission is to build an ecosystem focused on leveraging technology in education where STEAM, Robotics, Coding, Artificial Intelligence & AR/VR are utilized as crucial tools for kids to become smart in their academics and be able to solve modern world problems.

Vision

The company's vision is to nurture innovation and 21st century skills in K-12 students across the globe and prepare them for the future technological world. We are on a journey which will help every student to elevate core skills like Logical Thinking, Creativity, Computational Thinking and Problem - Solving.

WHAT WE BRING

Our Offerings for K-12 Schools

1. **STEAM**
2. **Robotics**
3. **Coding**
4. **Artificial Intelligence & IOT**
5. **Machine Learning**
6. **AR & VR**

PARTNER WITH INDIA'S LEADING BRAND

- Composite Skill Lab Setup as per CBSE guideline
- Appointing Personalised Trainer
- Quarterly Workshops for All the Teaching Staff
- Installation of Computer Lab for AI & Coding
- Robotics Kits - Gradewise (3:1 Ratio)
- Specialised Robotics Exhibition

WHY IT MATTERS

Need of Robopulse Integrated Program to Build 21st Century Skill

Why STEAM ?

- Nurture future problem solvers.
- Unlock logical and creative mindset from young age.
- Develop innovation culture among young students across the globe.

Why Experiential Learning ?

- Engaging and reflecting on the experience
- Trying out and testing new skills and abilities
- Gaining knowledge from the experience

Why Design Thinking Approach ?

- Teaches students to question.
- Makes students open minded and flexible.
- Students can give effective reasoning for each problem.

FORBES

130 Mn jobs will be created in AI itself by 2025.

WORLD ECONOMIC FORUM

By 2030, 65% of children entering primary schools today will ultimately end up working in completely new jobs that don't yet exist.

McKINSEY REPORT

Around 300 Mn people may need to switch occupational categories and learn new skills like technological, social and higher cognitive skills by 2030.

U.S. DEPARTMENT OF EDUCATION

"In an ever-changing, increasingly complex world, it's more important than ever that our nation's youth is prepared to bring knowledge and skills to solve problems, make sense of information, and know how to gather and evaluate evidence to make decisions." Enhancing such skills lies at the heart of STEM and STEAM education.

As the studies suggest that the inclusion of STEAM curriculum at an early age demonstrates higher level of 21st century skills set in students which is very necessary for our coming generation to compete in the global job market.

Careers of the future will not just be limited to those with a specific set of skills or knowledge, they will also involve creativity and critical thinking.

- **Critical Thinking**
- **Communication Skills**
- **Creativity**
- **Problem Solving**
- **Perseverance**
- **Collaboration**
- **Innovation Skills**
- **Social Skills**

OUR PROGRAMS

Our Offerings for K-12 Schools

STEAM & ROBOTICS

STEAM and Robotics is an educational program that aims to prepare students for the 21st century workforce by equipping them with the skills necessary to solve complex problems and innovate in a rapidly changing world. Robotics allows students to learn STEM concepts through hands-on activities. They learn how to program, design, and make their own robotics projects/models. STEAM-Robotics typically focuses on project-based learning, where students work in teams to design and build solutions of real-world challenges.

CODING & AI

Coding and AI is a fun and engaging way to introduce young learners to the world of technology and programming. Kids start with block-based coding that use visual, colorful blocks to represent code. Through coding, kids have the ability to create their own interactive games, stories, animations. AI needs to become part of the school curriculum as basic technology literacy. Through hands-on activities and projects, students can gain a practical understanding of AI and explore its potential for creating innovative and real-life projects.

AUGMENTED REALITY & VIRTUAL REALITY

AR/VR provides a smart learning environment that brings students to the center of the learning environment. AR/VR based immersive and experiential learning has the potential to create a deeper level of engagement with target topics, in a distraction free environment. Moreover, it empowers teachers to better understand a student's connection with the material being taught, to identify possible gaps in knowledge and to attend to those issues in a timely manner. This would make the experience much more relevant and meaningful, for both students and teachers.

ATAL TINKERING LAB

ATL is a dedicated innovation and experimentation space within Indian schools, established as part of the Atal Innovation Mission (AiM) by NITI Aayog, Govt of India. ATL aim to inspire and nurture innovation, problem-solving abilities, and technological interest among students. STEMROBO is leading edtech company to setup more than 2000+ ATLs nationwide. Our objective is aligned with this program to create an environment of innovation, creativity amongst Indian students.

HOW WE TEACH

Our Methodologies

CIC Methodology and Design Thinking Approach serve as the foundational framework of all our ROBOPULSE programs and curriculums.

CONSUMER

→ (ABL)

INNOVATOR

→ (PBL)

CREATOR

The proprietary CIC (Consumer+Innovator+Creator) methodology is meticulously designed to guide students through a progressive journey, commencing as consumers and advancing into innovators and ultimately creators. Students embark on their journey by engaging as consumers, working with various DIY Kits and coding platforms to perform activities crafted around real-world scenarios. This Activity-based Learning (ABL) assist students in ideation and growth as innovators, encouraging them to think outside the box. Ultimately, students transform into creators, gaining the capability to innovate and drive change in the world by addressing real-life problems aligned with UNSDGs through Project-based Learning (PBL).

Design Thinking Approach

We foster real-world problem solvers through 'Design Thinking' integrated into STEAM education. Our curriculum encourages hands-on projects where students identify issues, empathize, brainstorm, prototype, and iterate solutions. This process nurtures creativity, empathy, critical thinking, and problem-solving skills, promoting collaboration and innovation. Students apply STEAM knowledge to solve genuine challenges, preparing for impactful roles. We prioritize interdisciplinary learning, project-based tasks, and a supportive, diverse environment.

01 Empathize

Research are encouraged to explore problem of community by empathizing.

02 Define

Analyze the entire problem to define core issue that can be solved.

03 Ideate

Generate a range of creative ideas that can solve defined problem.

04 Prototype

Experiment on ideas by hands on activity and create a tangible product.

05 Test

Bring the solution to real life and take the feedback from mentors.

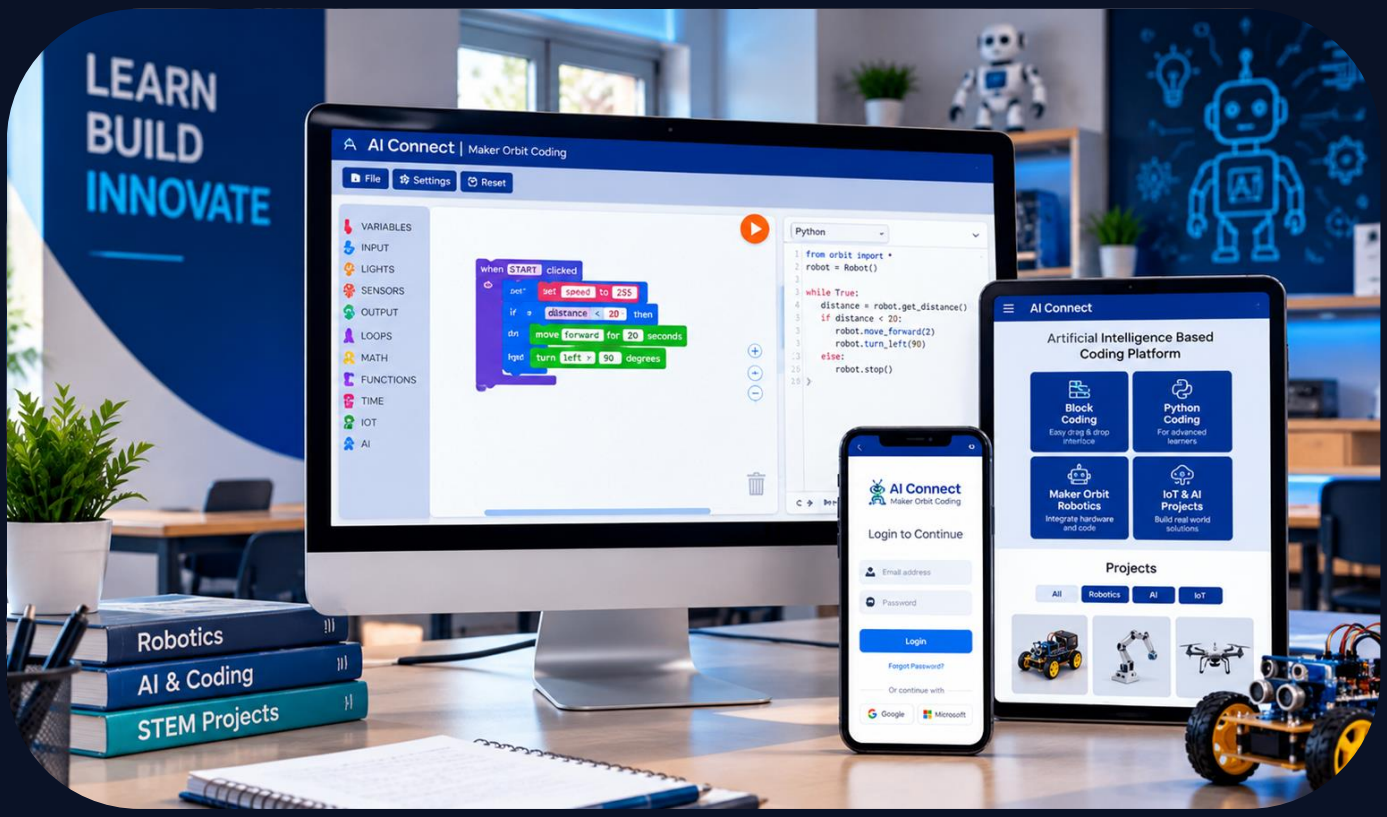

06 Implement

Launch the solution on ground and gain real-life experience and feedback.

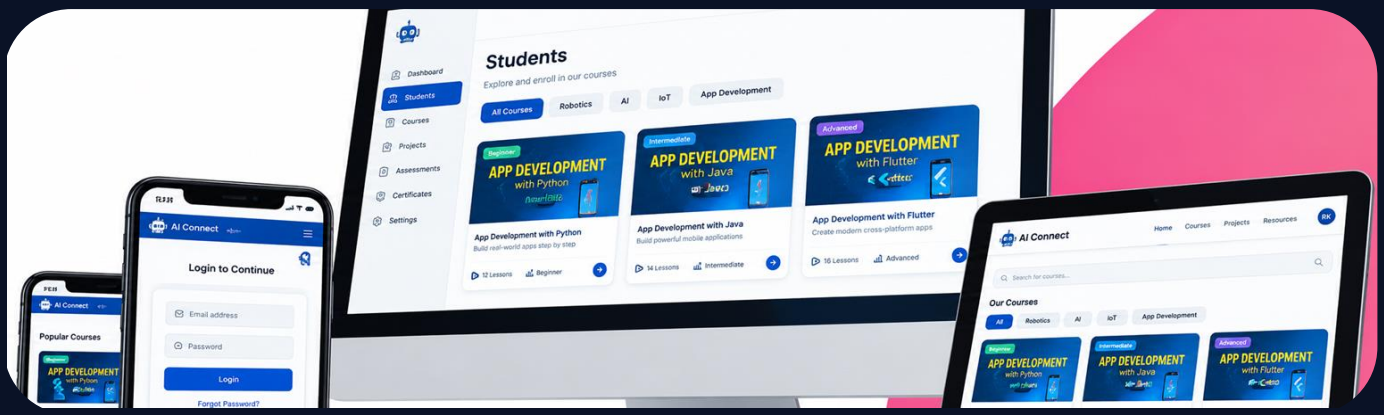

SOFTWARE PLATFORMS

AI Connect

World's first unified AI & ML Coding Platform.

- Easy and User Friendly Interface
- Diverse Python Activities
- Block-Based Python Programming
- Seamless Integration with Python IDLE
- Block to Text Conversion
- Graphical Python Activities

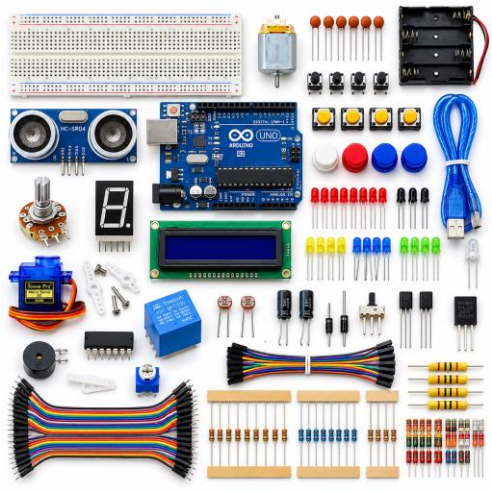

HARDWARE

Our In-House Basic Kits

1. RoboPulse Starter Kit

"Get hands-on with robotics! Our Starter Kit introduces you to the world of robotics with easy-to-build projects, interactive sensors, and coding activities. Perfect for beginners, it includes everything you need to build, code, and innovate."

2. RoboGenius

"Take your robotics skills to the next level with our Intermediate Kit! Dive into advanced projects, explore sensor integration, and master programming techniques. Build complex robots, learn AI and automation, and unleash your creativity."

HARDWARE

Our In-House Kits

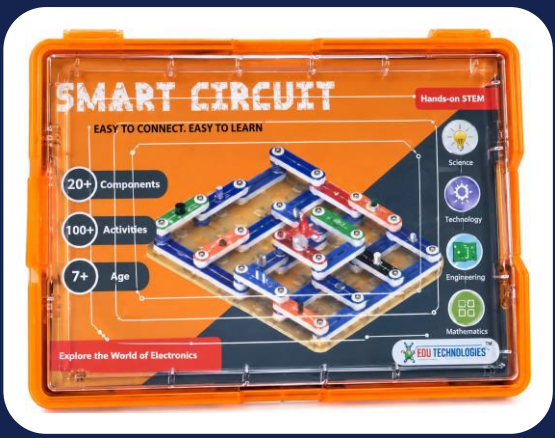

Arduino Starter Kit

- Prototyping kit suitable for exploration of electronics and programming.
- Encourages students for DIY projects and product development.
- Robust, reusable institutional kit supported by gamified coding platform.

Basic Electronics Kit

- 50+ fun filled circuit combinations with reusable electronics components.
- STEM expert-curated content for fun and practical learning of electronics circuit!
- Enables solderless circuits, simulation and realtime prototyping.

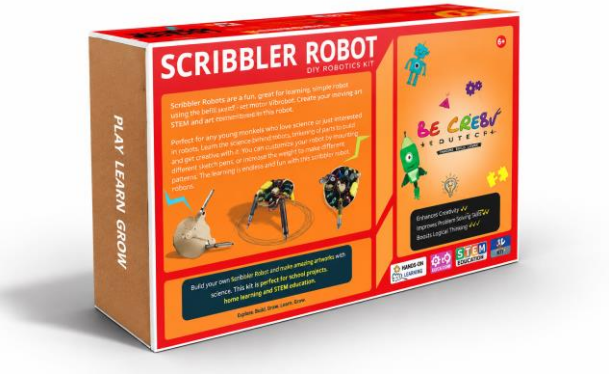

Smart Circuit

- Boundless creativity through 60+ DIY electronics projects.
- Specially designed magnetic modules for making learning fun.
- Easy-to-follow instruction manual for activity and project-based learning.

ADVANCED

SmartBotics Kit

"Unlock the future with our Advanced Robotics Kit! Dive into cutting-edge tech like AI, machine learning, and IoT. Design, build, and code complex robots that interact and adapt. Perfect for innovators and tech enthusiasts, push the boundaries of robotics."

Drone

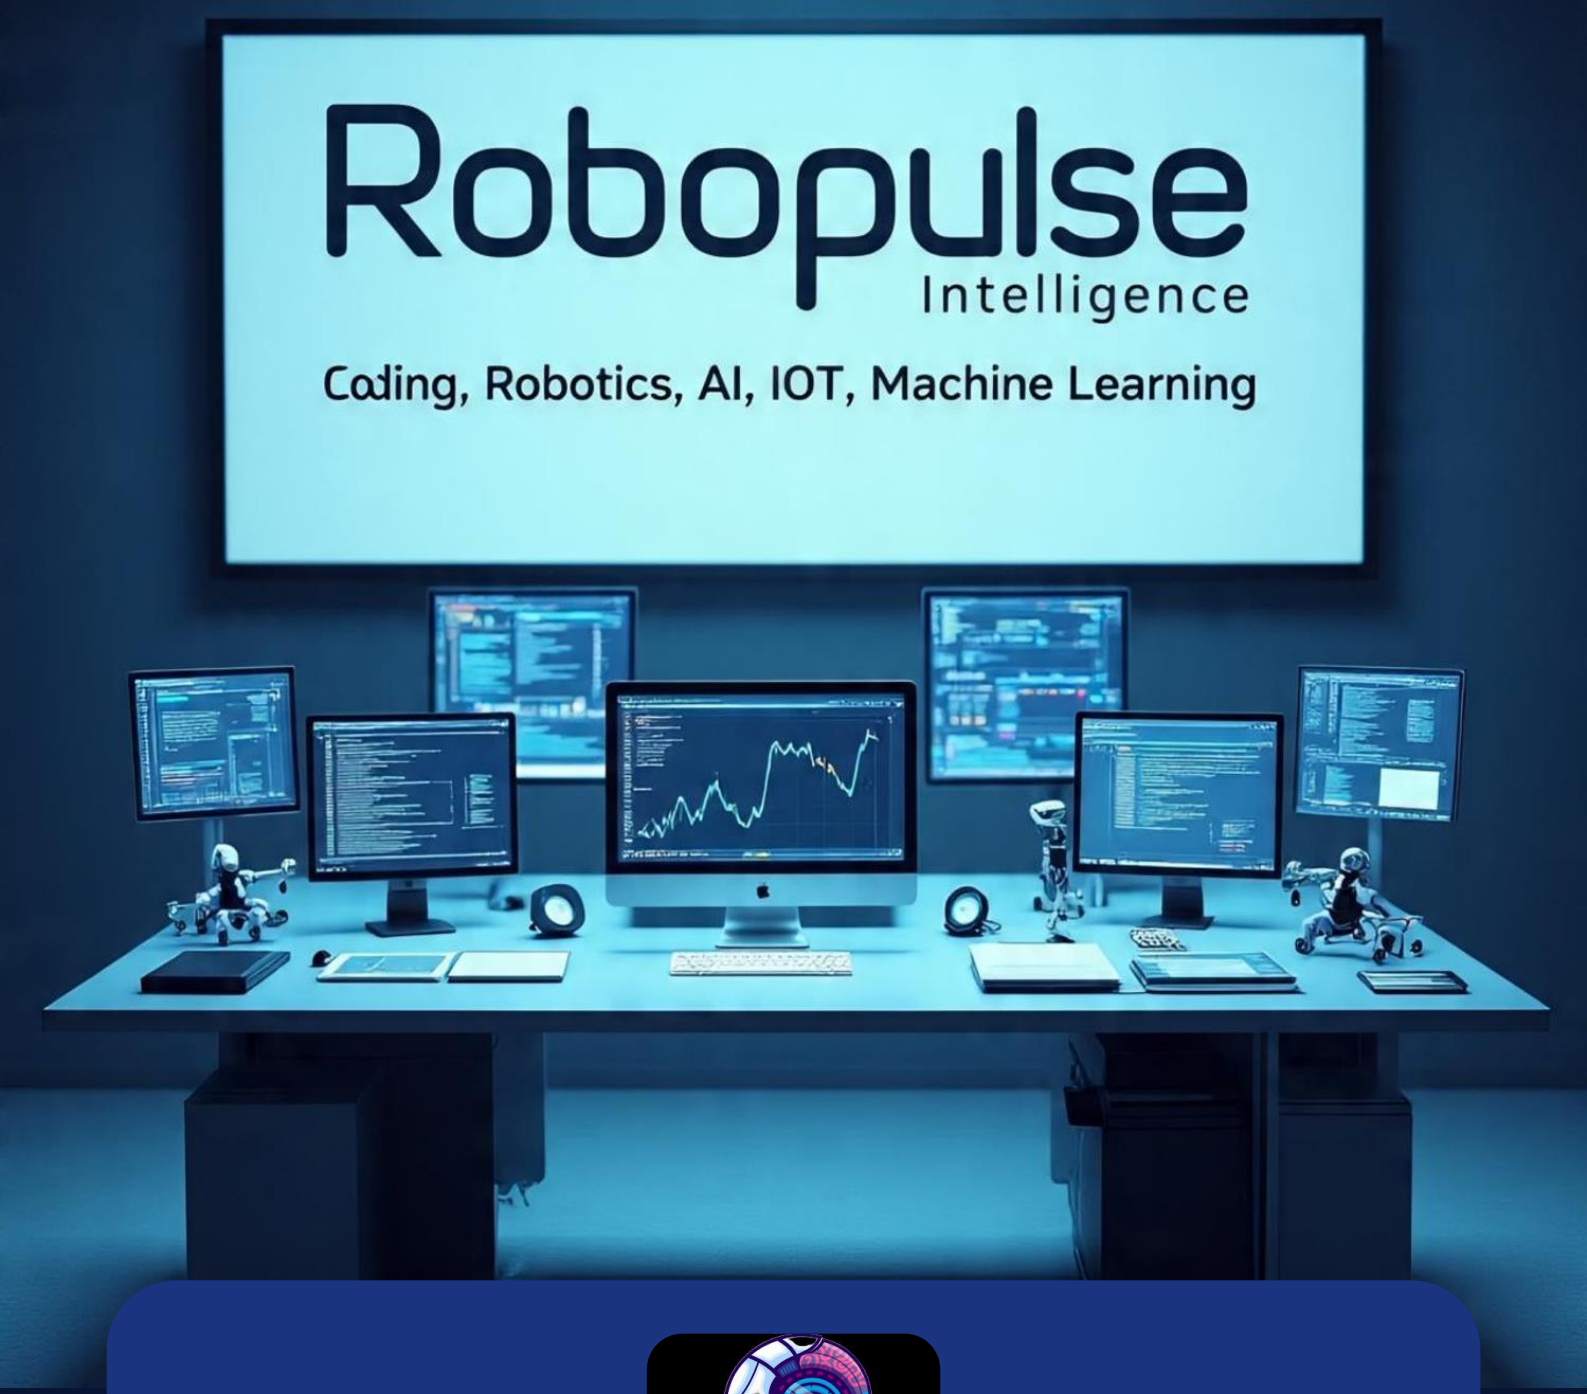

- Enjoy smooth 360° flying with easy controls that make the drone fun and simple to operate.
- Capture clear photos and videos and watch the live view directly on your smartphone using the app.
- Draw a flying path on your phone and see the drone follow the route automatically.
